OPEN 40 TASKS PRIORITY

- As a user, I would like the chatbot to respond appropriately to properly worded questions so that I get an answer to my question 7 nlp query
- As a user, I would like the UI to have a professional-looking and functional look so that the software has a quality feel 2 interface
- As a user I would like to receive answers to my queries that are based on current/updated data 4 query
- As a user, I would like the two versions of the software (Brock vs Canada Games) to be distinctly different visually so that I know which version I am on 1 interface
- As a user, I would like the webpage to have a desktop and mobile version so that it will be properly formatted on all of my devices. 2 interface
- As an administrator, I would like the chatbot to recognize when a user has given a greeting as input so that the chatbot can respond appropriately 1 nlp query
- As a user, I would like the chatbot to be able to recognize most minor typos or misspellings so I don't have to waste time rephrasing obvious mistakes 3 nlp query
- As an administrator, I would like the software to have a modular design so that future updates may add other languages 2
- As a user, I would like a "type your questions here" prompt so that I know where to input my queries 1 interface
- As a user, I would like to have the software open to a starting menu so that I can navigate to the Brock University or Canada Games version of the software 2 interface
- As a user, I would like the usage screen to have a clear, legible text display of the last 5-6 messages so that I can easily read the input/output 1 interface
- As a user, I would like to be able to choose the font size of the text so that I can pick a font size that's easy for me to read 1

- [ ] As a user, I would like the input bar to clear itself but remain selected when I input a query so that I don't have to do that myself for the next input 1 interface
- [ ] As a user, I would like the 'Enter' key to input a query, so that I don't have to use my mouse to click the enter button 1 interface
- [ ] As a user, I would like the input bar to grow in size when I type a message longer than the bar's width so that I can read the entire query 1 interface
- [ ] As an administrator, I would like the input bar to have a character limit so that users are prevented from entering ridiculously sized inputs 2 interface
- [ ] As an administrator, I would like the software's design to avoid bright flashing and quickly changing colours to protect users with epilepsy 1 safety
- [ ] As a user, I would like the chatbot to attempt to respond to difficult questions using general keywords so that I can rephrase my question or be pointed in the right direction to find the answer myself nlp query
- [ ] As a user, I would like the chatbot to respond to completely unintelligible input with a message like "I do not understand what you are saying" so that I can retry nlp query
- [ ] As a user, I would like to be notified when the chatbot's services are inaccessible due to no internet connection (30 seconds with no progress) so that I know why the chatbot isn't working 1 operating environment
- [ ] As a user, I would like to be notified when a resource (Brock/Canada games webpage) related to my query is unavailable so that I know why the chatbot isn't working 1 operating environment
- [ ] As a user, I would like the software to be compatible with all standard browsers (Google Chrome, Internet Explorer, Microsoft Edge, Firefox, Safari and Chromium) so that I have a high chance of being able to access the software with my personal device 1 operating environment
- [ ] As a user, I would like the software to be compatible with less common browsers (Opera, UC Browser, Yandex Browser, Maxthon, Vivaldi) so that I can be sure that I will be able to access the software with my personal device 1 operating environment
- [ ] As a user, I would like a "Help Me" button so that I can understand how to use the chatbot 2

- [ ] As a user, I would like some form of video documentation made available explaining how to use the software so that I can understand how to use the chatbot 2 documentation
- [ ] As an administrator, I would like a support email made available to the users so that they can make their questions or concerns known 2 interface
- [ ] As a user, I would like a return button to so that I can return to the starting menu 1 interface
- [ ] As a user, I would like to be greeted by the chatbot (greeting plus prompt/instructions) upon loading up the usage screen so that I know what to do to start the interaction interface
- [ ] As a user, I would like last 50+ messages to be stored so that I can scroll through the chatbot interaction 2
- [ ] As a user, if I am using a mobile device, I want the input bar/chat log to be raised above the keyboard that pops up when I select it so that it is not covered from view interface
- [ ] As a user, if I am using a mobile device, I want the keyboard to close automatically if I open the options menu interface
- [ ] As a user, I would like a frame rate limiter to manage power consumption
- [ ] As a user, if I am using a mobile device, I would like a "Wi-Fi-only" option to save mobile data
- [ ] As a user, I would like a clear button so that I can easily/quickly get rid of any text in the input bar 1 interface
- [ ] As a user, I would like a way to copy the entire conversation thus far so that I can save it for later 1 interface
- [ ] As an administrator, I would like users to be prevented from sending multiple follow up questions while the chatbot is 'thinking', so that the chatbot can finish answering the initial question 1 interface
- [ ] As a user, I would like user interface interactions to take roughly 0.1 seconds so I don't have feel like I'm waiting too long performance
- [ ] As a user, I would like intensive tasks to on average take less than 5 seconds (no more than 10 seconds) so I don't have feel like I'm waiting too long 1 performance
- [ ] As a user, I don't want the chatbot to store any user data for security reasons security

As a user, I would like the app to communicate over HTTPS so that my communications cannot be read in plaintext over the network

2 security
